

## 1. Create App Store Connect Record

- 1 Go to App Store Connect
  - 2 Click "My Apps" → "+" → "New App"
  - 3 **Bundle ID:** com.tomascora.neverforgettasks
  - 4 **App Name:** "Never Forget" (check availability)
  - 5 **Primary Language:** English
  - 6 **Category:** Productivity
- ## 2. Upload the Archive

## 3. App Store Assets & Metadata

### Required Screenshots:

- **iPhone 6.7"** (iPhone 15 Pro Max): 1290×2796 pixels (3-10 screenshots)
- **iPhone 6.5"** (iPhone 14 Plus): 1284×2778 pixels (3-10 screenshots)
- **iPad Pro 6th gen:** 2048×2732 pixels (3-10 screenshots)

### App Store Copy:

## 4. Privacy & Legal Requirements

**Privacy Policy** (Required - create one at your website):

### App Privacy Questions (Answer in App Store Connect):

- **Data Collection:** Yes (Calendar data for sync)
- **Data Linking to User:** Yes (Google account)
- **Data Tracking:** No
- **Third-party SDKs:** Google Calendar API, Google Sign-In

## 5. Export Compliance

- **Uses Encryption:** Yes
- **Encryption Type:** Standard encryption (HTTPS only)
- **Export Compliance:** Exempt (standard encryption)

## 6. Review Information

- **Contact Email:** Your email
- **Phone Number:** Your phone
- **Demo Account:** Not required (app works without Google sign-in)
- **Review Notes:**

## **Upload Process**

### **Option 1: Xcode Organizer (Recommended)**

- 1 **Open Xcode** → Window → Organizer
- 2 **Select Archives tab** → Find your "Never Forget" archive
- 3 **Click "Distribute App"**
- 4 **Choose "App Store Connect"**
- 5 **Select Upload** (not Export)
- 6 **Follow wizard** - Review automatically managed signing
- 7 **Upload** - Takes 5-15 minutes

### **Option 2: Upload with Xcode Cloud**

- 1 Enable automatic building in App Store Connect
- 2 Connect your Git repository
- 3 Configure build workflows

### **Pre-Submission Checklist**

- App Store Connect app record created
- Screenshots captured (iPhone 6.7", 6.5", iPad)
- App description written
- Privacy policy published
- Privacy questions answered
- Export compliance completed
- Review information provided
- Archive uploaded to App Store Connect
- Build processed (wait 15-30 minutes after upload)
- Build selected for submission
- Submit for review

### **Potential Review Issues to Address**

- 1 **Google Calendar Permission:** Ensure clear explanation of why calendar access is needed
- 2 **App Functionality:** Make sure core features work without Google sign-in
- 3 **Persistent Alarms:** Verify notification permissions are properly requested
- 4 **User Interface:** Ensure all buttons/features are accessible and functional

### **Timeline Expectations**

- **Upload Processing:** 15-30 minutes
- **Review Time:** 1-7 days (typically 24-48 hours)

- **If Rejected:** Address issues and resubmit (another 1-7 days)

### **Next Steps**

1 **Create App Store Connect record** (15 minutes)

2 **Capture screenshots** (30 minutes)

3 **Write app description** (20 minutes)

4 **Upload archive** (30 minutes)

5 **Complete metadata** (30 minutes)

6 **Submit for review** (5 minutes)

Your app is technically ready for submission! The main work now is creating the App Store Connect listing and providing the required marketing assets and metadata.
